

NuTone®

CENTRAL VACUUM SYSTEMS

CV653

The CV653 works with the CI370 Series Indicating Inlets to conveniently remind the homeowner at the wall inlet location when it is time to change the filter bag in their power unit. Or a light on the CV653 also reminds home-owner of the system's status.

ADVANTAGE®
CENTRAL VACUUM SYSTEMS

NuTone Advantage Series Power Units – an important part of Total Indoor Air Quality...solutions for today's lifestyles!

Advantage Series Power Unit

Quiet, efficient performance from a single-motor, bag filtration unit, for mid-size to larger homes up to 4,000 square feet. Includes sound insulation and muffler. Green LED light on power unit indicates system is powered, changes to amber after 25 hours of use to indicate dirt receptacle bag should be replaced.

FEATURES:

- 3-stage bypass motor
- Reduced sound levels
- System status indicator light
- Replaceable bag filtration for quick and easy soil disposal
- UL Listed / CSA Certified
- Two Year Warranty

SPECIFICATIONS:

Motor	3-Stage Bypass
