
Decorative Fan/Lights Bring Styling to Next Level, Maintain Quiet

Hartford, Wis., April 21, 2006— The new Decorative Fan/Lights from NuTone® can add dramatic detail and elegance to bathrooms, powder rooms or any room while incorporating an inconspicuous ventilation fan at the same time, according to Lynn Mantha, product manager.

“All seven of our new Decorative Fan/Lights combine attractive styling with very effective performance to deliver form and function,” says Mantha. These new models take advantage of the latest trends in lighting without compromising powerful ventilation.

Two power and sound levels are offered, both appropriate for a wide range of bathroom sizes. Four models offer 70 CFM with a sound level of 3.5 Sones while three models feature a more powerful yet quieter 80 CFM at 2.5 Sones. The fans exhaust air through inconspicuous vent openings in the light fixture’s base.

The Decorative Fan/Lights are available in five corrosion-resistant finishes, including oil-rubbed bronze, pewter, satin nickel, white and nutmeg hand-painted cast. Style choices cover a range of tastes from antique to contemporary, giving homeowners several style options.

Rugged, galvanized steel houses a plug-in, permanently lubricated motor and polymeric blower wheel. The plug-in light fixture assembly uses two standard incandescent 60-watt candelabra light bulbs. A tapered, polymeric four-inch round duct fitting makes for easy, positive duct connection and provides for no metallic clatter. Its plug-in light fixture assembly allows for quick and accurate installation.

NuTone® is a trademark of NuTone Inc, a subsidiary of Broan-NuTone and North America's leading manufacturer and distributor of residential built-in convenience products including door chimes, central vacuum systems, stereo intercom systems, home theater speakers, medicine cabinets, ironing centers and ventilation fans.
